SUB and Plaza Get Official Names

By SABRINA GOODWIN

The Student Union Building (SUB) is one of the most popular places on campus. The SUB is where many students congregate to socialize. The Student Union Building will formally be named April 23, 1982 after Dr. Joseph Authur Payne, Jr.

Throughout Payne's duration at Tennessee State University, he held various offices. Payne was the first acting Dean of Students, Vice President of Student affairs and a professor of education. Payne was responsible for originating the Student Government Association, Student Union Building and student plaza at TSU. Payne was a part of Tennessee State's family from 1958 until his death in 1976.

Dr. Gretchen Payne, wife of Dr. Joseph A. Payne, who has also been at TSU since 1958 and is the head of the Department of Curriculum and Instruction stated that "during the early 60's, when the segregated school system was broken because of the various marches and sit-ins by students, Payne was one of the administrative leaders who helped the students through this period of upheaval."

Payne was a native of Nicholasville, Kentucky and Jessamine County, Kentucky. Dr. Joseph and Gretchen Payne have

one daughter, Dr. Joan Payne Johnson who teaches in the Speech Department at Howard University.

Payne received his A.B. from Kentucky State College in Frankfort, Ky., his M.S. and ED.D. from Indiana University in Bloomington, and he did his post doctoral study at Harvard University in Cambridge, Mass.

Payne's professional experience includes teaching at Jessamine County, Kentucky Public schools, Dean of Men and Professor of Education at Swift Junior College, Rogersville, Tenn., and Dean of Faculty at Barber Scotia College in Concord, North Carolina.

Payne was a consultant for the Southern Association of Colleges and Schools, and the United Board for College Development and was the first black president of the Southern College Personal Association.

Dr. Joseph A. Payne Jr. is responsible for several programs at TSU, such as Honors Day which will be held April 23rd, 1982. The trophy that is given each year to the fraternity or sorority with the highest grade point average is given under Dr. Joseph A. Payne. Dr. Gretchen Payne gives a scholarship to the honors program every year under her husband's name.

The Student Union Building (SUB) will formally be named for Dr. Joseph Authur Payne, Jr. on April 23, 1982.

From "Plaza 101" to "Welton's Plaza"

By SABRINA GOODWIN

The plaza which is located in front of the Student Union Building known to many as "Plaza 101" will soon be taking on a new name. The plaza will be named after Dr. Hazael Edward Welton, the largest known alumnus contributor.

Welton made a donation of \$20,000.00 in high yield municipal bonds to Tennessee State University. The yearly interest yield of the bonds plus the face value at maturity will probably mean a donation of over \$35,000.00

Dr. Welton graduated from Tennessee A&I in 1932, enrolled in the school of Optometry at Ohio State University and graduated in 1938. Dr. Welton was among the first black optometrists in the nation and the first to be registered in Georgia.

In 1945, Dr. Welton and his wife moved to Cleveland, Ohio and opened his office in the building with other doctors and lawyers, which did quite well. After Dr. Welton was established, he then began to work in the com-

munity. He worked with the Y.M.C.A. board in Cleveland, joined the Elks Club and held various offices with them; he also worked on the City Boy Scout Advisory Board and was a trustee in his church. In 1956, with some advanced studies, Dr. Welton was the first black inducted into the Fellowship of the American Academy. Welton is now the Vice-President of the Northern Ohio Association of Optometrists.

In 1967, the Hough Norwood Family Health Care Center opened and Welton was chosen to head the eye department. He has been with them ever since. Welton is also over the eye department of two other clinics in Cleveland, Ohio.

There will be one four-year Hazael Edward Welton scholarship of \$6,000.00 offered at the beginning of the fall semester 1982. This scholarship is offered to any graduating high school senior or entering freshman for the fall semester 1982. Applicants will be judged on academic performance, admission scores, and active participation in school and community affairs.

Humphries Urges Patience In TSU Address

By TERRI ROWLAND

In a speech to the Faculty Forum on January 21, Dr. Fredrick Humphries, President of Tennessee State University, expressed concerns resulting from questionable implications of the merger of U.T.N. and Tennessee State University.

In reviewing his years spent at the university, Humphries reminisced back to the progresses, the problems and complexities that have confronted Tennessee State from the past to the present.

"All of us on this campus, those who lead, those who follow, and the professed enlightened ones, must begin now to do what we require on paper and demand in person of our students: be inquisitive, be objective, have understanding," he stated.

He also stated, "One question I pose to you today is, can we build a university which prides itself in what it does—not who is doing it? In 1979 at the first faculty and staff dinner of the merged institutions, I made a statement which I think is worth repeating now. How successful we are in merging our differences to make a oneness can really determine whether the American Dream can be realities for all those who seek to share it its fruits and its benefits. We have in our very grip the opportunity to

create for this country an institution of higher education that does not particularly serve the needs of any one constituent, but serves the needs of all of those, be they black and poor or white and rich, Jews or gentile, foreign or domestic. This was my position then and it is my position now. The issue is how do we accomplish this with compassion, adherence to the hallmarks of higher education. In a society where all share equally in the American Dream."

From the Role and Scope Document submitted to the Board of Regents in 1981, Humphries stressed that the "goals" and "priorities" have not changed TSU because of the merger with UTN.

"The merger of Tennessee State University and the University of Tennessee at Nashville did not change the goals and priorities of Tennessee State University, it only "expanded" the university to "more fully meet the needs of an urban environment that will result in it becoming a major urban university. This characteristic of the Plan for Merger is noted on several occasions, most specifically when the merged institution is referred to as the "Expanded Tennessee State University," implying that the Tennessee State University had not lost any of its original

characteristics, that it was only taking on one on its way to becoming "a major urban university. In the expansion process, Tennessee State University took on some of the characteristics of the University of Tennessee at Nashville as its programs were brought under the administration of Tennessee State University," Humphries said.

Humphries also added that the community as well as faculty members were expecting too much of the university too soon.

"No institution in America has achieved what many of you expect TSU to accomplish and many of them have been in existence longer. We have in higher education and in our society as a whole two extremes. One is all-white and the other is all-black. What we are attempting at this University is to create a median—an institution where neither of the extremes would exist. If the American Dream can be played out on this campus then, the extremes will never exist," declared Humphries.

According to Humphries, the existence of an institution that does not equate "color" with "contributions" is a major goal suggested by the first President of the university, the late William J. Hale. He also concluded that to build this type of existing institution, this goal is a necessity.

TSU Participates in Bio-Medical Research

BY BILLIE H. MEANS

The Minority Biomedical Support program (MBS) has been set up at Tennessee State University. It is a part of the Department of Health and Human Services which is a division of research resources of the National Institute of Health.

The goal of the MBS program is to enhance biomedical research experiences and participants by minority faculty and students, in areas related directly and indirectly to health fields. Program objectives include (a) providing research funds to support biomedical research at minority institutions, (b) providing research funds for minority biomedical scientists at institutions other than the historically minority institutions, and (c) to allow for research experiences and training by minority students.

The MBS program at Tennessee State University began in March of 1974. Dozens of TSU alumnus have been student participants in the MBS program over the past eight years, 22 of which entered medical

schools and 18 who pursued graduate education. MBS faculty and student participants have made presentations at major scientific meetings as well as many within the University community. In just the past three years, MBS participants have presented papers in such cities as Atlanta, Ga., Woods Hole, Mass., Albuquerque, New Mexico, Boulder, Colo., Raleigh, N.C., Oak Ridge, Tenn., and Washington, D.C.

Currently, there are five faculty participants (Principal Investigators) and 16 student participants in the MBS program. The three year grant (for more than \$600,000) supports research into several areas; bio-feedback (Dr. Helen Barrett—Psychology), enzyme biochemistry (Dr. Ying-Ming Lin—Chemistry), genetic disorders (Dr. Jacqueline Martin—Biology), host-parasite relationships involve in Trypanosomal infestation (Dr. Edward Risby—Biology) and the biological impact of polychlorinated biphenyls, PCBs (Dr. James Adams—Biology).

Student participants in the MBS program are funded to the tune of \$3,000.00/year for undergraduate students and \$5,040.00/year for graduate students. Tuition and fees are also paid for graduate student participants. In addition, most MBS students are provided with travel to at least one scientific meeting per year by their principal investigator.

As of March 1st, the directors anticipate re-funding of the MBS grant for more than \$1,400,000.00 over the next three years. Along with this funding increase would come some eight or more new student MBS positions and up to four new faculty participants. The MBS program is interested in receiving applications from both graduate and undergraduate students for these new positions as well as positions to be vacated by graduation of MBS participants. The minimum requirements are 2.5 GPA and a minimal number of courses in biology, math, chemistry and psychology (requirements vary for different types of research). To apply for the MBS program see Ms. Ethel Carpenter in the MBS office (Women's Building, Room 38).

Dr. Edward L. Risby is the director on leave for the MBS program. Dr. James A. Adams is the acting director.

Free Dental Screening and Cleaning for Children at TSU

The Department of Dental Hygiene at Tennessee State University will sponsor a Children's Dental Health Day on Feb. 15 in recognition of National Children's Dental Health Month.

Between the hours of 9 a.m. and noon, and 1 p.m. and 5 p.m., TSU dental hygienists will provide free dental cleanings, fluoride treatments, dental screenings, myofunctional therapy screenings educational activities and special surprises for all children who are accompanied by an adult, said Toni DeBiase, coordinator of the activities. All children in the Nashville community are invited.

The Dental Hygiene Clinic is located in Clement Hall at 35th Avenue North and Alameda Street on TSU's Main Campus.

Faculty and students in the joint TSU-Meharry Medical College Dental Hygiene Program will also participate in a number of activities throughout Nashville during the month of February. Skits to be performed by TSU students will follow the national theme for the month, "Captain Wondertooth says: Smile America . . . and we'll smile back at you." National Children's Dental Health Month is sponsored by the American Dental Association and local affiliate groups.

For more information about Children's Dental Health Day at TSU interested parents or representatives from day care centers should contact Toni DeBiase or Judith Riggs at 320-3565.

DMMEF Starts Second National Minority Internship Program

NEW YORK, Jan. 15—Racial minority students from colleges across the country will be able to explore career opportunities in the rapidly-growing \$112-billion direct marketing field through an industry-sponsored internship program, according to Richard L. Montesi, president, Direct Mail Marketing Educational Foundation (DMMEF).

In the summer of 1982, twelve minority students will intern for eight weeks at New York metropolitan area direct marketing firms. Each student's transportation to and from New York, room-and-board for two months, and a \$225-per-week stipend will be underwritten by the direct marketing firms participating in the DMMEF program. In addition to on-the-job experience, the interns will benefit from a series of orientation and general meetings where they will discuss direct marketing with experienced professionals in the field.

DMMEF internships are open to any racial minority student who has completed at least his or her junior year. There is no restriction regarding academic concentration, but the selection committee will certainly consider a student's in-

terest in direct marketing and in a business career. This is a highly-competitive program designed to select minority people who have potential for successful direct marketing careers. Only a limited number of internships are available. Only one student per department within a school should apply.

Application forms for the program can be obtained through college placement officers and marketing/journalism professors who will be sent full information and applications in January. Additional applications are available from the Direct Mail Marketing Educational Foundation, Inc., 6 East 43rd Street, New York, NY 10017. Deadline for applications is March 17, 1982.

The Direct Mail Marketing Educational Foundation seeks to improve the scope and quality of direct mail and direct marketing education in college and universities and to encourage students to consider careers in the industry. Established in 1965, the Foundation conducts semi-annual Career Days and Direct Marketing Institutes where hundreds of college students learn about direct marketing.

Afro-American History Month

Experience a new and different lifestyle in the Valley of the Sun, surrounded by the beauty of the living desert, seven nearby lakes, cool mountain ranges, and clean air. Other pleasant experiences await - a low cost of living, outstanding schools and universities, and year-round cultural events.

Goodyear has a variety of opportunities for graduates with BS or MS degrees in electrical engineering or physics and who are interested in one or more of the following areas:

RF and Microwave Circuits
Transmitters and Receivers
Radar and Reconnaissance Systems
Digital and Analog Circuits
Signal processing
Microcircuitry
Antenna Systems

Projects include digital processors, air-to-ground data links, and display systems, synthetic-aperture radar, and ultrahigh resolution laser recorders.

Join Goodyear for a step forward in your professional career. For immediate consideration, mail your resume to: Professional Recruitment, PO Box 85, Litchfield Park, AZ, 85346. US citizenship required.

We will be on campus Friday, February 12, 1982. Contact your placement office for appointment.

GOODYEAR AEROSPACE

EQUAL OPPORTUNITY EMPLOYER M/F

Ralph McGill Scholarship Fund

ATLANTA, GA.—The Ralph McGill Scholarship Fund offers scholarships for the 1982-83 school year of up to \$1,500 each to students with southern backgrounds who have completed at least two years of college, Jack Tarver, chairman of the Scholarship Fund said today.

Tarver said May 1st is the deadline for applications. He said a number of scholarships are awarded each year to students who have demonstrated a long-time interest in the news and editorial phase of newspapering.

Scholarships, he said, are limited to those young men and women whose roots lie in the south. Applicants must also convince the Awards Committee that they firmly intend to pursue a career in daily or weekly newspapering. Tarver said the Awards Committee wants to give scholarships to those who are likely to become leaders in the newspaper field.

Successful applicants will be required to maintain a "B" average in order to keep the scholarship.

A letter of not more than 500 words telling why the applicant wants a scholarship, together with a photograph of the applicant must accompany each application. Applicants also must have a letter of recommendation from a college authority.

Application blanks may be obtained from: The Ralph McGill Scholarship Fund; Box 4689; Atlanta, Georgia 30302.

A.F.R.O.T.C.

Air Force ROTC is on the move once again at Tennessee State University. The Detachment is led by Lt. Col. Charles Gutheri and his staff of professional officers. The Cadet Corps (student group), is headed by Cadet Group Commander James Watson, a TSU student. Mr. Watson also has prior service in the Air Force.

Not only does ROTC teach students the role of the Air Force in wartime, but in everyday life. Students also learn what the military has to offer them in terms of careers, responsibility, benefits, and scholarships.

Stop by the Detachment, located on Centennial Boulevard, in front of the football field and feel free to ask any questions about the programs being offered. Air Force ROTC. A Great Way Of Life.

Matter of Opinion

Is Cheating Part of the American Way?

The Black Institution: A Pathway to Self-esteem

By BILLIE MEANS

Before matriculating here at Tennessee State University I had attended one other predominately black institution and two other predominately white institutions. In retrospect, I realize that my self-concept was different depending on whether the university I was attending was black or white. This situation was not just relative to me. It appeared to be a fact that more students at the black schools felt better about themselves and more confident than their counterparts at the predominately white schools. I see the reason for this difference as being due to the two different atmospheres surrounding the two types of institutions. Allow me to clarify myself.

While I was at the white institutions, the entire social, political, and academic orientation was catered to the white anglo-saxon protestant student. One in particular, let us call it *university 1*, catered specifically to the middle class white student. There were very few traditionally black fraternities and sororities. The Afro-American studies program was in the process of being faded out because the university felt it was obsolete. There was a very disproportionate amount of black professors at the university. One of the things I resented the most was the overall attitude of the white students towards the black students. Often comments were made by the white students implying that the black students' admission to the university was based on lower standards; thus, implying we were not as competent students. Obviously, where attitudes and policies such as these exist, the black student, being in the minority, can not help but feel slightly paranoid or at the least threatened.

But why should a black student have to conform to such conditions? He or she does not. This is why the black institutions exist. During the reconstruction era, black schools like Fisk and Tuskegee Institute were set up so that we, via education, could progress ourselves as a people. On a more basic level these institutions simultaneously acted to instill self-confidence in its students.

My intentions here are not to suggest that black students at white institutions do not acquire these same levels of self-esteem. Many black students have been graduated from white universities and have done quite well. However, I merely intend to point out that black institutions, by mere definition, contain an atmosphere less threatening; thus, it is an atmosphere more conducive to learning for the black student and a place where the student is repeatedly reminded that he/she is someone.

BY VICKY THOMPSON

Is cheating part of the American way of life?

Seems like one of our pass-times is cheating the tax man. A study made for the internal revenue service found strong indications that more than a quarter of American taxpayers have cheated in the past. The proportion was higher among

self-employed. People cheat by under reporting income, overstating deductions, and illegally claiming dependents. The study suggested some reasons for the cheating, including ignorance of the penalties and an attitude that it's not such a serious matter to cheat the government.

There's cheating on exams. Many students admitted that they

would cheat on a test if given the chance and pressured to get high marks. But those who do cheat, do so under pressure. A student stated, "It's the teacher..." The teacher is accused of cheating, by helping their students on tests so a class will make a good showing.

Many of us wouldn't cheat on an exam or swipe something from a store counter. But how about that

"souvenir" ashtray or towel that the hotel or restaurant we visited didn't really mean to give us? One chain of hotels and motels is said to have reported losing three million dollars worth of towels in just one year.

Are we just born cheats?

E-Systems continues the tradition of the world's great problem solvers.

Even given the benefit of historical perspective, it is difficult to fully comprehend the enormous contributions to man's knowledge made by Sir Isaac Newton. His *Philosophiae Naturalis Principia Mathematica* is termed by many authorities to be one of the most important single works in the history of modern science. His studies of light are the foundation of physical optics and his laws of motion provided a quantitative description of all principal phenomena in our solar system.

Today, scientists and engineers at E-Systems employ Newtonian principles to develop products and systems for satellite communications, exploring

space and the development of solar energy, systems which are the first-of-a-kind.

E-Systems engineers are recognized worldwide for their ability to solve problems in the areas of antennas, communications, data acquisition, processing, storage and retrieval systems and other systems applications for intelligence and reconnaissance.

For a reprint of the Newton illustration and information on career opportunities with E-Systems in Texas, Florida, Indiana, Utah

and Virginia, write: Dr. Lloyd K. Lauderdale, Vice President Research and Engineering, E-Systems, Inc., Corporate Headquarters, P. O. Box 226030, Dallas, Texas 75266.

TSU Art Exhibit Opens

By TERRENCE WORTHAM

Paintings, pottery, and tapestry were all a part of the recent art works by the TSU art department on display in the University's Art Gallery in Elliott Hall (Women's Bldg.). The display will be held from January 22-February 26. The art on display was contributed by the faculty of the art department.

Art Department head, Dr. Herman Beasley, said that the faculty has been preparing for the exhibit for nearly a year and that some of the works had been created especially for this exhibit. Over 40 works are on display, some of which are for sale with prices ranging from \$10.00 to \$400.00.

According to Dr. Beasley, the purpose of the exhibit is for community and faculty development as well as cultural enrichment. Dr. Beasley hopes that TSU's art displays will be as popular as other art shows around the city.

"Art is a statement of heritage stated Dr. Beasley, "but young blacks don't care about art. They are only interested in partying." One hundred and seventy people attended the opening night ceremonies and reception. Only 30 percent of the people who attended the ceremonies were students.

The art department gives 11 art shows a year, one each month. Dr. Beasley said the future of these exhibits depends on the students. "Until you (young blacks) can look past the canvas and paint and see the artist's meaning, the paintings will only be decorations on a wall and the exhibits will only be status quo."

Spring Break Is Better In The Bahamas

Football season is over, you're right in the midst of final exams and all you can think about is spring break—relaxation, tennis every day and a chance to replace your pale complexion with a golden tan.—A remote thought when funds are low and there's ice hanging from your windowsill.

But thoughts of an inexpensive spring break in a location with sea, sand and constant sun is not as far away as you may think. Those friendly, subtropical islands of The Bahamas boast year-round sunshine—perfect for every sun-worshiper and sports enthusiast—and with special student prices, being in "paradise" for spring break can become a reality.

When thinking of The Bahamas, you may visualize one island very distant from the U.S., but there are actually 700 islands which begin only 50 miles off the coast of Florida. With continuous reductions in airline fares and connections from every major city, a short plane ride could start you on your way to a beautiful dark tan and loads of excitement.

Golf, tennis, fishing, sailing, scuba diving, gambling, dancing, wind-surfing and gorgeous beaches—literally anything under the sun can be found in The Bahamas—except cold, dreary weather.

Starting in February, Spring

Break in The Bahamas will be the greatest party time ever held in the islands. Your vacation will begin with welcome happy hours and continue with fabulous beach parties, fascinating calypso entertainment, shopping trips, sightseeing tours and super sports activities. For further information contact Inter-collegiate Holidays Inc., 501 Madison Avenue, New York, NY 10022, 800-223-0694; or your local travel agent. (Prices may vary according to operator and program).

With year-round sunshine and such a wide range of sporting activities, you can truly say, when it comes to Spring Breaks, "It's Better In The Bahamas."

Entertainment

Greek Week

Observation and Participation

Attention Students! With Spring fever nearing, it is time for the annual Tennessee State University "Greek Weeks."

During each week fraternities and sororities will be presenting festivities, with the purpose of honoring their Greek organizations. Everyone is invited to attend these functions, which will include dances, talent shows and other activities. They will also be displaying their paraphernalia.

Starting the events off, will be the Alpha Phi Omega's whose week starts January 31. Preceding will be Kappa Alpha Psi Fraternity, February 7; Delta Sigma Theta, February 14; Zeta Phi Beta, February 21; Alpha Kappa Alpha, March 14; Phi Beta Sigma, March 2; and ending this series on March 28 will be Alpha Phi Alpha Fraternity.

Activities will be posted, so stay informed with what will be happening with our Tennessee State University Greeks, by reading the Meter.

About Your Health

Reaction to Stress

Many people today believe that they are doing something great when they take on more work, activity, and responsibility, even though they eventually find themselves under great pressure. Students, business or professional life often places the individual in a highly competitive situation and under heavy pressures. Even though stress can't be entirely avoided, it can be minimized; one way is to find relaxation. Anything that grabs your attention and is fun will relieve the mind, for the time being, of all student, business or professional pressures.

There should be a balanced daily schedule with enough time for rest. A happy family, social and religious life will also be helpful. The most effective methods of relief are rest, change of interest, and change of scenery; but prevention of stress is the best cure.

Let's Start Cooking

Blueberry Cobbler

Begin 2 hours ahead
6 to 8 servings

Cobbler Filling:

- | | |
|----------------------------------|---------------------------|
| 1/2 teaspoon ground cinnamon | 6 cups blueberries |
| 1/2 teaspoon grated lemon peel | 3/4 cup sugar |
| 1/4 teaspoon ground nutmeg | 1/4 cup all-purpose flour |
| 1/8 teaspoon salt | 2 teaspoons lemon juice |
| 1 tablespoon butter or margarine | |

1. Prepare Cobbler Crust as directed. Preheat oven to 425 degrees.
2. For filling, toss together blueberries, sugar, flour, lemon juice, cinnamon, lemon peel, nutmeg, and salt. Place filling in 9 1/2 by 1 1/2 deep pie plates; dot with butter or margarine. Top with crust. Bake 50 minutes or until brown.

Cobbler Crust:

- | | |
|-------------------------|----------------------------|
| 1 cup all-purpose flour | 1/3 cup shortening |
| 1/2 teaspoon salt | 2-3 tablespoons cold water |

1. In medium bowl with fork, lightly stir together flour and salt. With pastry blender or 2 knives used scissor-fashion, cut in shortening until mixture resembles coarse crumbs.
2. Sprinkle in cold water, a tablespoon at a time, mixing lightly with a fork after each addition until pastry just holds together. With hands, shape into a ball. If it is a hot day, wrap in waxed paper and refrigerate 30 minutes.
3. On lightly floured surface with lightly floured rolling pin, roll pastry into a circle 2 inches larger than 9 1/2 by 1 1/2 deep pie plate; place over filling; trim edges and make a decorative edge. Cut a 4 inch "X" in the center of crust; fold-back points from center of "X" to make a square opening.

ABSOLUTELY FREE!

FREE TAX PREPARATION PLUS WE WILL PAY YOU \$10.00

Sound too good to be true? It is true and just in time. Tillmann & Associates will pay you \$10.00 plus do both your state and federal tax returns. Tillmann & Associates is a national company that has helped thousands of Americans with their tax matters. There is one thing that we ask of you. Tillmann & Associates has another company that specializes in market surveys. After we complete your tax forms and after we pay you \$10.00 in cash we will ask you to help us with our latest survey. The survey only takes 9 or 10 minutes of your time. We will ask you your opinion of several nationally advertised products. You have probably seen similar surveys being conducted in shopping malls. It is simple. It will save you money and it will pay you money.

We are the best tax preparers in the nation. We are also the best at market surveys. We are now combining the two and at the right time of year. This is your chance to get paid while we do your tax preparation free!

We have selected several areas for our service. We have a large staff and will start work as soon as you answer the following information and return to us.

If you fail to send the requested information as stated we will not be able to proceed. As soon as we receive the above you will be contacted by one of our area representatives. She will ask you several questions regarding your tax returns. She will then arrange to meet you at your home or office and at a time that is convenient for you. During this meeting she will complete tax returns and give you \$10.00 in cash. She will then ask you several questions relating to our survey. The survey will only take about 9 or 10 minutes. We pay you \$10.00 and we do your tax returns. I think you will agree that this service is worth 10 minutes of your time?

- 1) Your full name _____

ALL APPLICATIONS SHOULD BE MAILED BY FEBRUARY 15

YOU'LL BE IMPORTANT FROM THE DAY YOU ARRIVE!
**Three Great Reasons
 to Choose MEAD JOHNSON**

OPPORTUNITY

If you are looking for a highly visible, growth oriented position that has meaning and importance, then consider the following career opportunities with MEAD JOHNSON & COMPANY.

Research, Development and Quality Assurance Opportunities — undergraduate degrees in chemistry or biochemistry; graduate degrees in organic or analytical chemistry.

Engineering Opportunities — degrees in electrical or mechanical engineering.

Finance and Accounting Opportunities — degrees in accounting.

Management Information Systems Opportunities — degrees in mathematics.

Engineering and Scientific Co-op Opportunities — Freshmen or sophomores majoring in chemistry; electrical or mechanical engineering.

MEAD JOHNSON is looking for Graduates with above average academic credentials, demonstrated leadership ability, and excellent oral and written communication skills. These are challenging opportunities that allow you creative use of your skills in an environment of growth and advancement. These are careers with a future — your future!

GROWTH

MEAD JOHNSON, a dynamic subsidiary of Bristol-Myers, is a leader in pharmaceutical and nutritional products. Our uninterrupted growth is the direct result of our innovation. Our operating style encourages personal creativity and contribution. We're successful because we have a strong heritage of accomplishments and a strong future.

LOCATION

MEAD JOHNSON is located in Evansville, Indiana, a community of beautiful residential areas, outstanding recreational opportunities, exceptional educational and cultural facilities, and more. Best of all, Evansville couples the advantages of southern economy with the changing beauty of four-season living.

To investigate these reasons for joining MEAD JOHNSON is to discover a wealth of others: Excellent salaries, superb benefits including paid relocation, and real growth, both personal and professional.

Discover MEAD JOHNSON! When it comes to your career no one can offer more!

**Scholarships
 Offered for
 Direct Marketing
 Institute**

NEW YORK, Jan. 14—Thirty full-tuition scholarships to a five-day direct marketing Collegiate Institute in Chicago, Illinois, March 21-March 26, 1982 are now available to seniors majoring in advertising, marketing, journalism, communications and similar fields, it was announced today by the Direct Mail Marketing Educational Foundation, Inc.

Successful applicants will get a practical introduction to basic direct marketing and direct mail techniques under the guidance of a dozen top practitioners in the fast-growing \$112-billion direct marketing industry. For example, the principles of direct mail success, creativity, mailing lists, testing, and other subjects will be covered at the Institute. The curriculum goes beyond direct mail . . . to cover such topics as telephone marketing, cable TV, Qube, space and broadcast advertising.

A panel of direct marketing executives selects institute scholarship recipients based on: faculty recommendations; the student's academic standing; interest in advertising and marketing; and record of extracurricular school-related activities and employment. Scholarships cover all tuition fees, room and board. Students are required to pay the first \$100 of transportation costs within the continental U.S.

Scholarship applications are available from professors or the Foundation (6 East 43rd Street, New York, NY 10017). Students attending schools located in Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio and Wisconsin should mail forms to: Mr. Al Dyon, Allstate Insurance Company, Allstate Plaza South 600, Northbrook, IL 60062. They must be received together with a professor's recommendations form by February 25, 1982.

Tiger Notes

The Tiger Sharks participated in the Louisville swim meet Friday. In spite of the ten point loss, the Tiger Sharks scored more points in this meet than ever against the Louisville team.

The Big Blue basketball team of TSU continued its winning streak in the victory over Florida A&M. However, the team fell short of keeping the winning streak with Saturday's loss to Belmont College. Ronnie Cage led the Tigers in scoring 33 points.

The Tiger Gems won its past two games against Florida A&M and Mississippi Industrial.

Tiger News

Did You Know . . .

Cab Calloway was born on Christmas Day, 1907, in Rochester, New York.

Redd Foxx began his show-biz career in a washtub band that played on street corners in St. Louis, sometimes earning as much as \$60 a night.

Lena Horne was the first black woman to sign a term-contract in films.

The first time a baseball player from another city and another team received homage at a major-league baseball stadium was when Roberto Clemente, of the Pittsburgh Pirates, was so honored at Shea Stadium on Sept. 24, 1971.

Part Time Work

Part-time work posting advertising materials for a nationwide firm. Choose own hours, 2-10 weekly. No selling—pay based upon amount distributed. Average earnings \$6.50 per hour. Other benefits. Independent work, requires good communication, consistency. Contact: Jean Swenson, 500-3rd Ave. W., Seattle, WA 98119 (206) 282-8111.

ENGINEERS, YOUR SHIP IS COMING IN.

It might be a nuclear sub or a billion dollar aircraft carrier. At the Norfolk Naval Shipyard, you can provide engineering support for the maintenance and testing of the most sophisticated technology in the world, with hands-on experience that will challenge your personal creativity, stimulate and enhance your engineering knowledge, and accord you a good measure of responsibility on important projects.

Our shipyard recruiter will be on campus on February 11, 1982

A General Information Meeting will be held on February 10, 1982; 7:00-8:00 pm Placement Office
An Equal Opportunity Employer U.S. Citizenship required.

Located in the Tidewater, Virginia area, the shipyard is surrounded by a vast array of recreational and cultural activities. Just minutes away, the resort city of Virginia Beach hosts water activities of all types and descriptions. Also, the shipyard is just a short drive from the Blue Ridge Mountains with its spectacular fall foliage and numerous winter ski resorts.

Students Are Talking About

Upcoming midterm exams . . . The long waiting period before refunds and work study checks come out . . . The Miller's beer truck being robbed during the noon hour . . . The Tigers losing to Belmont, or even playing them . . . The quick change of the weather. . . Upcoming events for Black History Week . . . The resurgence of flash light at the Delta's party . . .

BEGINNER OR ADVANCED Cost is about the same as a semester in a U.S. college. \$2,989. Price includes jet round trip to Seville from New York, room, board, and tuition complete. Government grants and loans available for eligible students.

Live with a Spanish family, attend classes four hours a day, four days a week, four months. Earn 16 hrs. of credit (equivalent to 4 semesters taught in U.S. colleges over a two year time span). Your Spanish studies will be enhanced by opportunities not available in a U.S. classroom. Standardized tests show our students' language skills superior to students completing two year programs in U.S.

Hurry, it takes a lot of time to make all arrangements.
FALL SEMESTER - SEPT. 10-Dec. 22 SPRING SEMESTER - Feb. 1 - June 1 each year.
